SURVIVAL TECHNOLOGY

SEAHAVEN

Discover the world's largest inflatable lifeboat

Travels independently for **24** *hours*

At a speed of **6** *knots*

TRUSTED TO PROTECT LIVES

Survival. Technology.

We are pioneers of Survival Technology that keeps you safe when your life depends on it. Our survival craft technology, wearable survival equipment and fire solutions are supported by our community of 3,000 experts across 96 countries.

We partner with our stakeholders to provide trustworthy solutions that reduce risk and help save lives.

Protecting over 1 million lives every day.

Trusted to protect the cruise industry with MES technology since 1979

We are a company built on many world firsts and continuous innovation. Survitec's roots trace back over 160+ years with 2020 marking 100 years since the introduction of inflatable Survival Technology. In 1979, RFD, our original Survitec company introduced the marine evacuation system to the world. Since then, we have been pioneering the way in MES and evolving Advanced Evacuation Systems (AES) to offer a portfolio of innovative, safe and reliable solutions.

REDEFINING EVACUATION TECHNOLOGY

The world's largest inflatable lifeboat - ready to be installed on your next vessel

Seahaven is redefining evacuation at sea. We identified an industry desire for change, for moving away from the standard and towards the innovative. Our game-changing design combines capacity and capability to deliver the most advanced evacuation system in the world today. Borne from the collaboration of our aerospace, defence and maritime Survival Technology expertise, our two-lifeboat system is complementary to MES and evacuates up to 1,060 passengers in under 22 minutes.

Rewriting what's possible in terms of safety, reliability, and deck footprint in one revolutionary product, Seahaven means a new era of potential for the passenger industry.

TRANSFORM YOUR SAFETY

Rapid evacuation

With rapid-4-minute deployment and the ability to accommodate 1,060, your passengers and crew can quickly, safely, and comfortably evacuate. We've harnessed revolutionary helical slide-based technology to improve functionality and passenger experience. Once safely on board SOLAS emergency packs can be accessed, and our ultra-reliable system travels independently for up to 24 hours, at a speed of 6 knots.

Safe to operate and maintain

As you would expect from any of our products, Seahaven is intrinsically safe, and our HWST-proven solution can be launched by your crew with a push of a button. We've designed a system that automatically inflates, minimising crew actions and the need for human interaction.

Improved passenger experience

A safe solution for all ages, sizes and abilities, the passenger's experience in an emergency is critical to protecting lives at sea and has been at the forefront of our design. You can be certain that evacuation with Seahaven is rapid, safe and intuitive.

4 minutes

RECLAIM YOUR SPACE

The world's largest inflatable lifeboat

Our safety standards have never been higher, just like Seahaven's passenger numbers. Seahaven is the largest capacity and most efficient evacuation system on the market and will accommodate 1,060 of your passengers and crew, with 530 in each lifeboat.

Your deck space unlocked

Seahaven opens up all kinds of vessel design possibilities, freeing up deck space and enabling new build ship designers and operators to explore retrofit opportunities, to completely reimagine your on-board environments and passenger experiences. By replacing conventional lifeboats and davits, you can take back up to 85% of deck space to revolutionise your passenger experience. Think of what could be possible with a reduced footprint of 16.3 x 3.6 metres fitted into a single deck.

BEYOND THE STANDARDS FOR RELIABILITY

Our people make the difference

Seahaven is tried, tested and trusted by 30 of our world-class marine engineers, over 5 years in the making. Our product draws on advanced technologies to ensure reliability at the core of the design and keep your passengers and crew safe should the worst happen.

Our application of aerospace methodologies brings a completely new dimension to marine industry reliability. We've taken the time to put new technology thoroughly and methodically through its paces and push the boundaries of what can be accomplished. Our robust quality processes and exhaustive testing goes way beyond what's essential, with our reliability test program setting a new standard of safety.

Operational efficiencies

Throughout the cycle of Seahaven you will benefit from operational efficiencies from extended service duration, reducing disruption to your vessel operations. What's more, on-board crew inspections and maintenance will also be reduced.

We go beyond compliance

As a compliance driven industry we understand our duty of care to your safe operation. We work beyond the standard to build long term valuable partnerships, to understand your needs and to deliver you real value and confidence in a service you can trust.

TRUST A GLOBAL, VALUED PARTNER

A world-leading brand

We provide products and services that help protect lives for our customers across the globe. We've grown through our dedicated workforce, passion and commitment to service customers, a drive for innovation and continuous development, a history of market firsts and a series of successful acquisitions and mergers.

Unrivalled knowledge

We are a market leader and innovator of evacuation solutions with unrivalled knowledge drawing on marine and aviation expertise. RFD, our original Survitec company introduced the first liferaft and marine evacuation system to the world, and now the world's largest inflatable lifeboat. We continue to pioneer the way in evacuation solutions, taking your safety to new levels.

The largest supply and service network

You can leverage our supply and service network, with ports and service stations across the globe. We are known for being where our customers need us and are always responsive to your needs.

It's time to embrace the future with Seahaven.
