

Your trusted innovative partner for

OFFSHORE WIND ENERGY

safety and Survival Technology solutions

JOINING FORCES TO DELIVER YOU MORE

We have joined forces - the coming together of three market leaders, with one shared purpose, to protect you with the most advanced Survival Technology solutions. Now, you have access to over three centuries of combined experience through one single supplier.

From air to sea, our pioneering and award-winning solutions help protect your offshore workers every day.

Be it during offshore transfer or on the turbine, we deliver reliable solutions throughout the lifecycle of your wind farm.

We've established success by working with companies worldwide that share our ethos, values and focus on quality and safety. This collaborative approach and uncompromising commitment to safety are why we are trusted to protect lives.

RELIABLE RENTAL SOLUTIONS

Complete duty of care with no capital investment

Following the acquisition of Hansen Protection and HeliPPE, our expanded rental model both broadens and deepens our offering to enhance our ability to support you with your helicopter transfer and CTV requirements.

Our trusted rental model is unrivalled with almost two million passenger transfers each year in the North Sea alone. The model is established across key locations and expanding to support the increase in global demand.

Partnering with us for your Personal Protective Equipment (PPE) rental delivers alternative benefits that go beyond the traditional purchase partnership by delegating your asset management to us.

Responsible duty-of-care delegation

We manage the provision, handling, storage, tracking, inspection, preventative and scheduled maintenance of your offshore transfer PPE.

No capital investment

Our rental solutions allow you to meet your PPE requirements and take advantage of new technology without the upfront capital investment.

Fixed, predictable pricing

Your contract will clearly outline the total cost of the agreement, allowing for efficient cost management and reporting.

The greener, more sustainable option

Renting PPE supports responsible resource management which reduces the need for stockpiling significantly and supports a shared, circular economy.

Heliport support teams

Our highly-trained heliport supervisors are available at a wide range of heliports and are responsible for ensuring all passengers are safely equipped and depart on time.

Portable support facility available

In addition to the established rental locations, we can provide a portable base to provide a responsive and flexible hub to accommodate your project requirements.

“ With a fleet of more than 60 state-of-the-art helicopters carrying out daily passenger transfers, we cannot afford to be complacent in the selection of those companies we partner with. The equipment and services Survitec supplies is key to ensuring all operations are carried out with the utmost safety, efficiency and comfort. ”

Jamie John, Aberdeen Base Manager, Noordzee Helikopters Vlaanderen (NHV)

OFFSHORE TRANSFER SUPPORT

From air to sea - your survival, our technology

We know travelling to and from offshore wind farms presents an element of risk for offshore personnel. Together with leading helicopter and CTV operators we have developed provisions to reduce this risk through the Survival Technology provided to your crew and passengers.

HELICOPTER TRANSFER PPE

Your trusted inflight guardian

Crew safety ensemble

1000S Front Aircrew Immersion Suit

Advanced design and fabric enhance flying performance and comfort for helicopter front aircrew. The outer shell of the suit is waterproof, breathable and inherently flame retardant, while the thermal lining uses phase change materials to combat thermal stress and increases wearer comfort. 4-hour certified.

- Three entry zip configurations available
- GORE-TEX Nomex outer shell combines breathability with fire protection
- Ergonomic design tested on all major aircraft types to enhance flying performance through superior temperature control and comfort
- Pockets can be adjusted to suit aircraft, mission or pilot preference

COMING SOON

Halo Aircrew Lifejacket

The Halo Aircrew lifejacket delivers a synergetic triad of comfort, style and safety performance. The ergonomic design is tailored to reduce interference with associated equipment, so aircrew duties can be completed unhindered and in comfort. Meanwhile, the life-saving technology protected within provides enhanced in-water performance.

- Nomex construction for product longevity
- Customisable configuration of accessory pocket
- Ergonomic Fusion 3D design that adapts to the shape of the wearer
- Available with fully integrated bespoke EBS
- Halo Hood System can be deployed over crew helmets

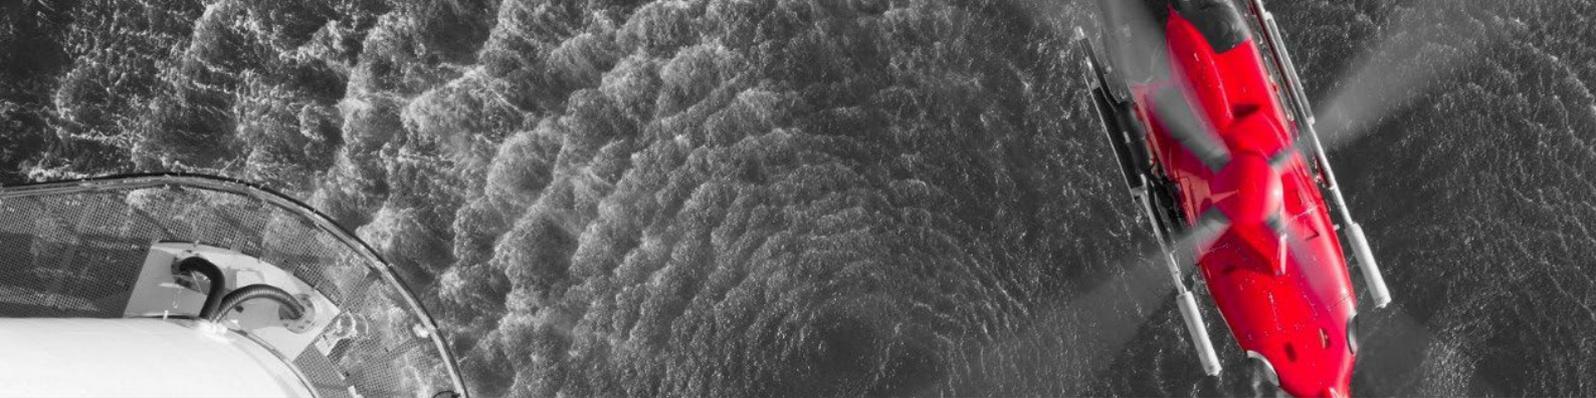

COMING SOON

Survitec Aircrew EBS

This lightweight EBS is designed for use with our Halo Aircrew lifejacket. It has been engineered to be deployed and used without restricting emergency actions by the aircrew. The 310 Bar cylinder provides 80% more breathable air than the industry minimum standard. Approved by CAA-UK in accordance with CAP 1034 and EN 4856:2018 Rotorcraft Emergency Breathing System (EBS).

- Capacity to hold 99.2lt of breathable air
- Ready to use
- Colour coded contents gauge
- Compressor or refill station as part of the Halo package
- Training provided

COMING SOON

Passenger safety ensemble

SeaWind III Immersion Suit

Designed for the transfer of your passengers to offshore locations, this triple certified (SOLAS, ISO and ETSO) suit has been constructed with a focus on comfort, style and performance.

- GORE-TEX Pazifik outer shell combines breathability with fire protection
- Ergonomic Y construction for unrestricted movement
- Compatible design to accommodate the required lifejacket and additional harness where applicable
- Available in a choice of seal configurations

Halo Passenger Lifejacket

Our Halo Passenger lifejacket provides your passengers with the most advanced lifejacket solution available for helicopter transfer – offering an enhanced level of safety, comfort and in-water performance.

- Nomex construction for fire protection and product longevity
- Ergonomic Fusion 3D design that adapts to the shape of the wearer
- Available with fully integrated bespoke Survitec EBS
- Integrated Halo Hood System provides enhanced in-water protection and visibility

Survitec EBS

This lightweight EBS can be deployed in one movement and is designed for use with our Halo Passenger lifejacket. The 310 Bar cylinder provides 80% more breathable air than the industry minimum standard. Approved by CAA-UK in accordance with CAP 1034.

- Capacity to hold 99.2lt of breathable air
- Ready to use
- colour coded contents gauge
- Compressor or refill station as part of the Halo package
- Training provided

CTV TRANSFER PPE

Your trusted onboard guardian

Passenger safety ensemble

SeaBreeze CTV Immersion suit

This is our robust, lightweight 1-hour work and immersion suit designed for CTV transfer in demanding environments. Your passengers will benefit from the ergonomic and breathable construction - as well as the easy integration of safety equipment.

- Breathable Superlight 3L outershell fabric
- Ergonomic Y construction for unrestricted movement
- Compatible design to accommodate the required lifejacket and additional harness where applicable
- Practically placed watertight pockets

Rope Access 3D 290N Lifejacket

This award-winning lifejacket is specifically designed for the offshore industry, the Rope Access 3D 275N includes an array of unique key features to aid both the comfort and safety of those working at height.

- Ergonomic Fusion 3D design that adapts to the shape of the wearer
- Removable back strap for attaching fall arrest harness
- Red crotch straps to ensure visibility with an additional protective cover to prevent twisting and snagging
- Easy to replace cover system

*Other SOLAS lifejackets available on request.

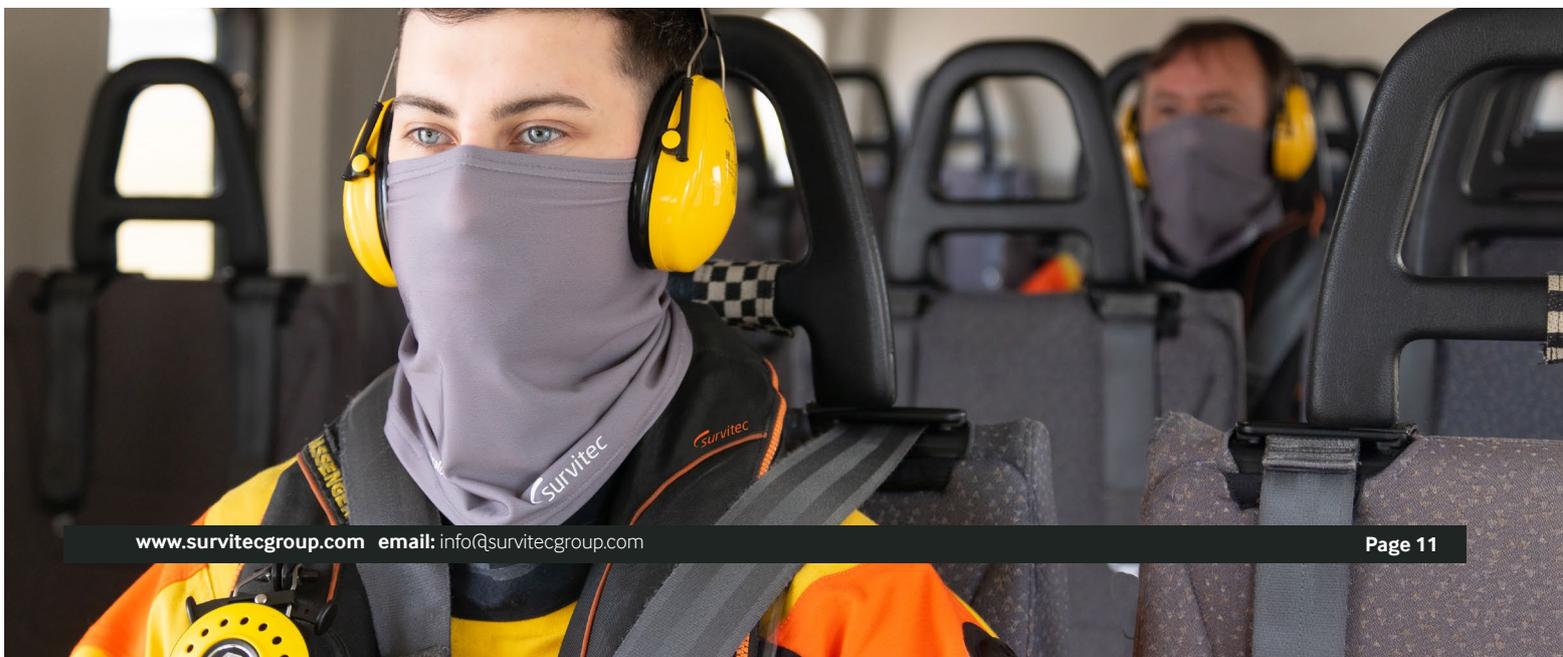

Emergency beacons

Emergency beacons such as Personal Location Beacons (PLBs) are essential for supporting a successful rescue in a man overboard scenario. Our extensive range of beacons provide solutions for a wide range of offshore applications including helicopter transfer, vessel transfer and overside activities.

Face coverings

Developed in cooperation with offshore majors and asset owners, our Survitec Protect 360 is a hydrophilic snood-type face covering that incorporates Polygiene ViralOff®. This face covering is compatible with marine and offshore wearables and should be considered as a key addition to the equipment offered to protect your offshore workers, including during helicopter and CTV transfer.

KIT BAG PACKAGES

We provide transfer kit bag packages which contain pre-assembled solutions specifically designed for personnel travelling to and from offshore locations. There are five options to choose from, each package of which has been tailored to meet your requirements and the demands of the diverse transfer environments.

All PPE, documents and certificates will be packed in a durable kit bag. Hoist set kits are provided in bags approved for lifting.

Helicopter transfer set

Helicopter hoist set

Transfer harness set

CTV transfer set (1 hour approval)

CTV transfer set (4 hour approval)

ON THE TURBINE

Taking your safety to new heights together

Our solutions do not end when you get to the turbine. From height safety, fire suppression and first aid products, we can partner with you to unite and deliver on your complete turbine safety and survival requirements.

Height safety, escape and rescue

With wind turbines increasing in height, the day-to-day safety of your maintenance personnel and their means of rescue and escape is vital. We advise and supply traditional rope-based rescue systems and the pioneering Evacuator descent device. In addition, we provide specialist height safety and rope access equipment such as harnesses, helmets and all other associated components

Immersion suits

In addition to constant wear immersion suits, we also provide immersion suits designed specifically for abandonment along with the appropriate storage cabinets.

Fire safety

It is estimated the number of turbines to catch fire per year varies between 1-in-2,000 to 1-in-15,000. We provide failsafe fire detection, protection and loose equipment to suit your turbine requirements.

Liferafts

We are the original liferaft leader who can provide you with world-class liferaft supply and servicing solutions for your wind farm operations.

SURVITEC VISCOM

Visual communication solutions

Survitec Viscom is our globally recognised provider of visual communication solutions specialising on video and 3D animation.

Our experience in creating multimedia services - combined with in-depth knowledge of safety and survival equipment - enables us to offer you the most appropriate and effective packages to promote your messaging and services.

Our clients know, like and trust us because we have the experience and expertise required to create memorable and life-saving material with minimal guidance to the tightest schedule.

On the turbine

We are specialists in the creation of HSEQ media to the energy sector. From complete offshore installation induction and evacuation procedures - to an interactive safety training course, we provide materials that support your operational and safety requirements.

Offshore transfer

The need for passenger safety briefings, on board safety cards and crew training materials are common requests from our offshore transfer clients. As specialist providers of the safety information required for offshore helicopter operations, we know the most effective ways to deliver instructions using video and animation.

Corporate

Whether it's a full-scale corporate video production to celebrate growth and attract new business or a short piece for use on social media we create the right message to promote your organisation. We support your HR initiatives with material that boosts retention of your communications.

ENVIRONMENTAL & SUSTAINABILITY

Embracing the principles of caring for our environment

We are taking a proactive approach with our employees, customers and suppliers ensuring that the principles of caring for the environment and sustainability are embedded in our business. We aim to make a positive

contribution to protecting the environment – by tackling what we can, where we can as well as educating and encouraging best practice throughout our company.

How are we delivering on our commitments

We are currently implementing a company-wide Integrated Management System monitoring Carbon and Greenhouse Gas emissions among a range of environmental stewardship actions.

Meeting industry standards and achieving recognised accreditations including ISO 14001

Our manufacturing facilities worldwide hold the ISO 14001 accreditation, and we have a corporate goal to achieve a Group ISO 14001 accreditation by Q1 2022.

Monitoring and auditing our progress

As part of our ISO 14001 accreditation, we monitor our emissions, waste and product recyclability to ensure we constantly improve our environmental performance. We have monitoring and auditing programmes to track carbon and waste reduction measures.

Reducing non-essential travel

Even before the global pandemic necessarily reduced travel, we had introduced wide-ranging procedures and enhanced technology to facilitate effective online communications among our teams and with our clients.

We have banned single use plastic water-bottles and cups on site.

WHY PARTNER WITH US?

We are fortunate to work with industry-leading customers. Our teams work tirelessly to meet the needs of our customers, regardless of whether our relationship is a full service and supply contract or a one-off sale.

We aim to enhance customer satisfaction in everything we do, providing value to you each step of the way.

Domain expertise

Our detailed understanding of offshore environments, building on over three centuries combined years of innovation in the development and support of safety and survival technologies.

End-to-end products and service

Our comprehensive range of products and services covering the complete lifecycle of a wind farm, from onshore and offshore construction to all people transfer activities and operations and maintenance works on the turbine.

A literally unrivalled global service operation

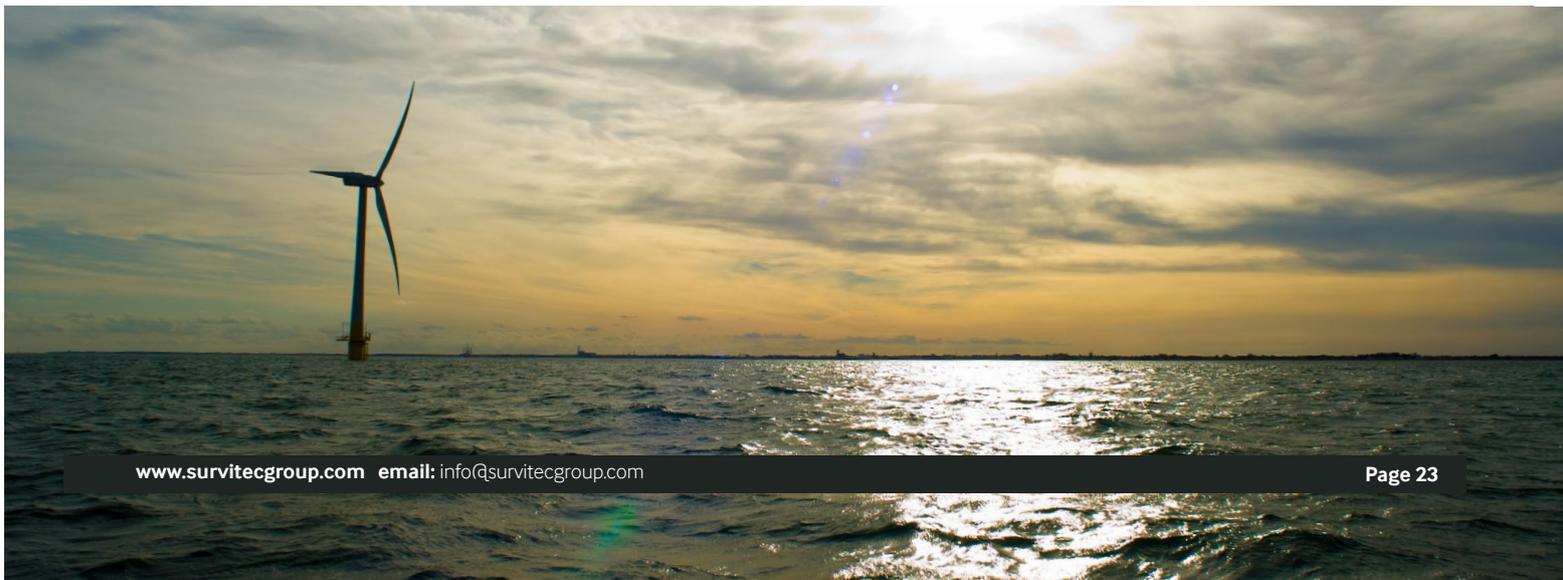

Covering over 96 countries and custom-designed to support every aspect of your work through our specialist, highly trained teams.

Complementary business ethos

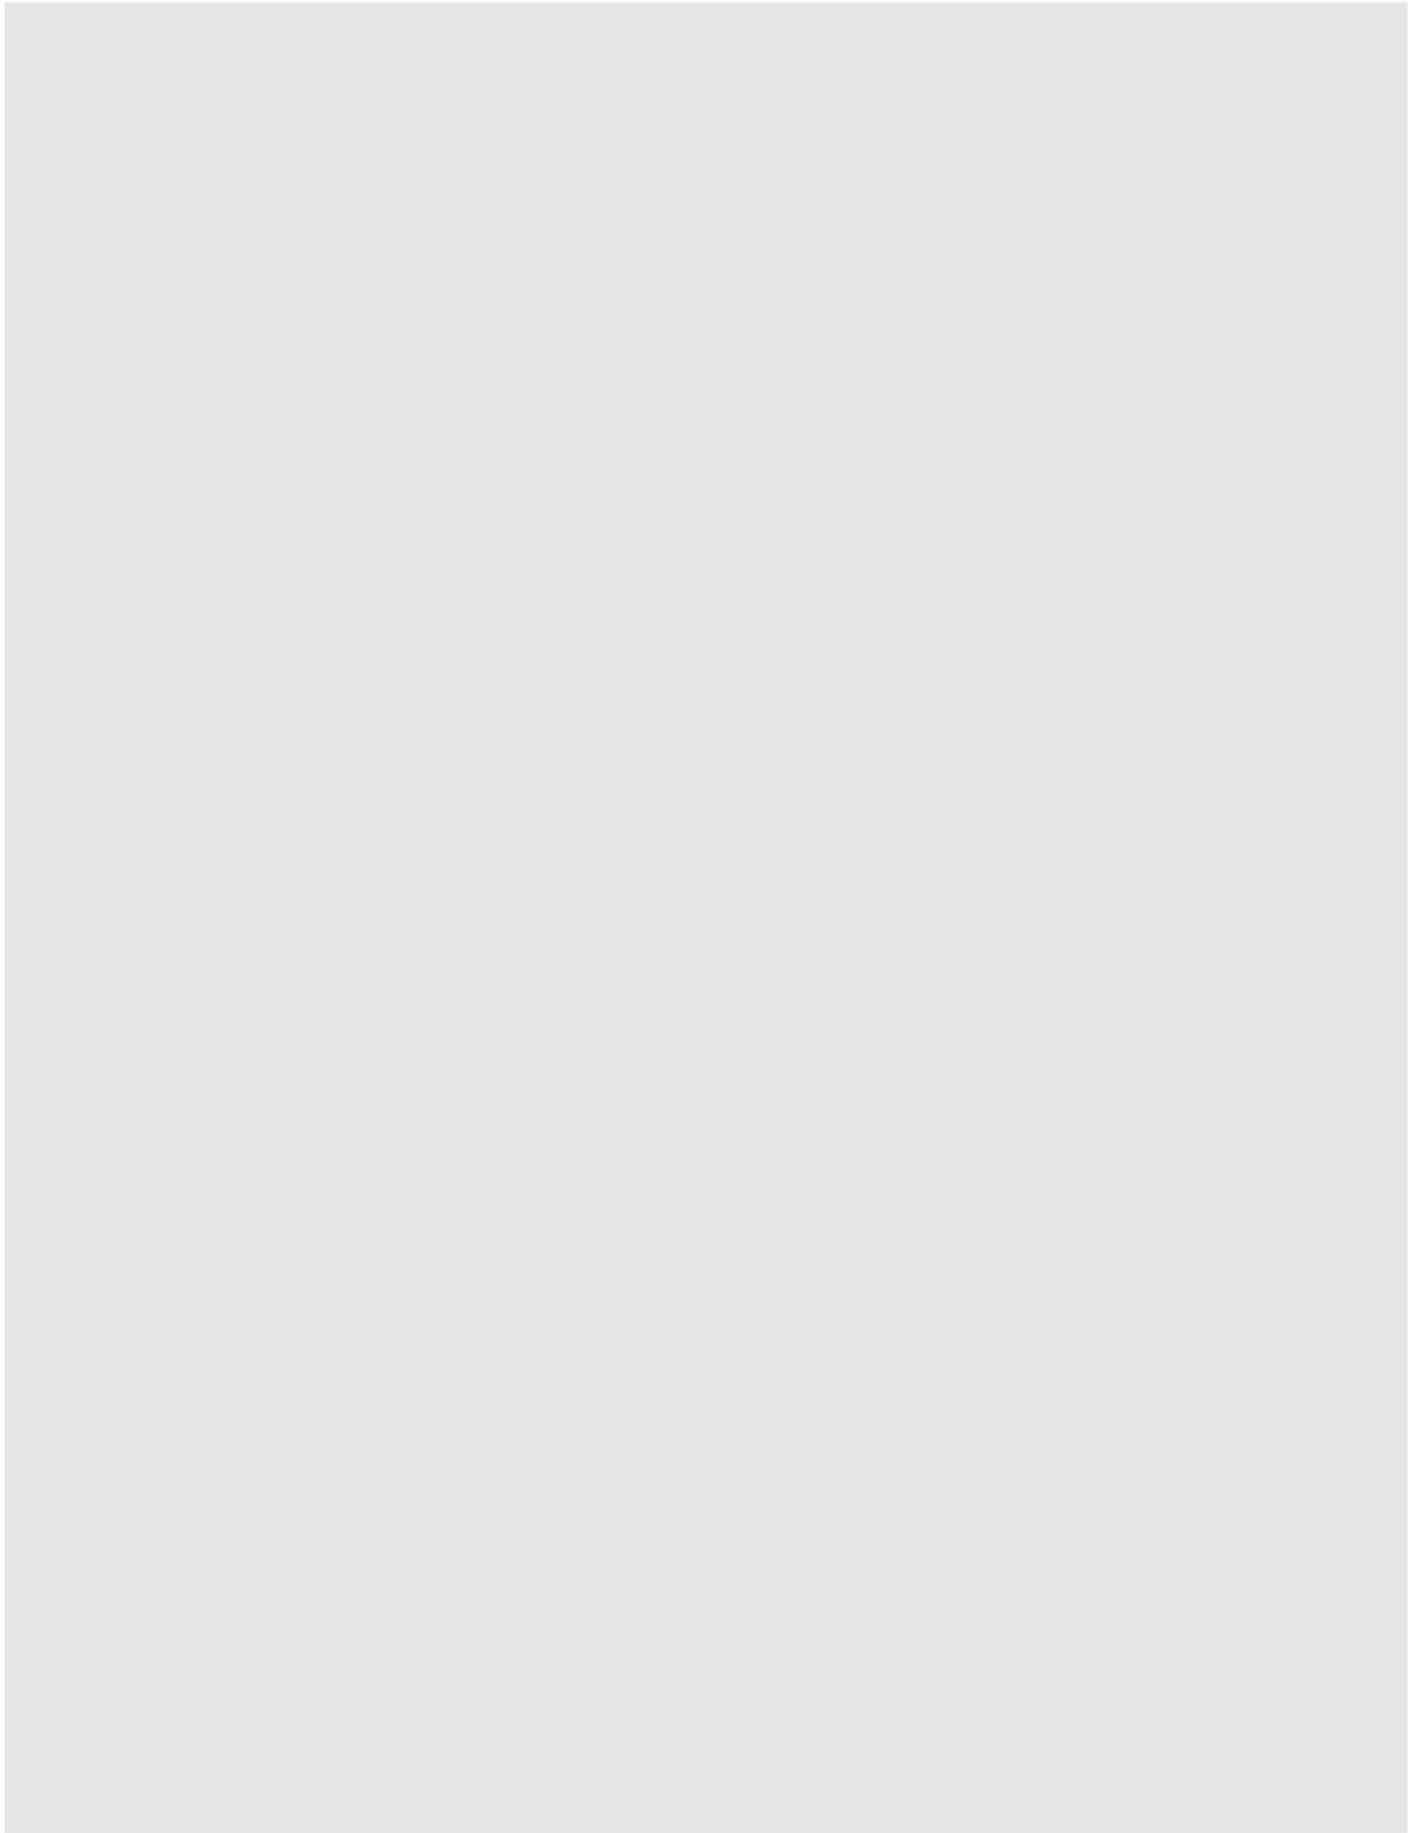

Our shared values and complementary initiatives enhancing social responsibility, diversity and inclusion, environmental management and sustainability.

Our uncompromising focus on safety, quality and compliance

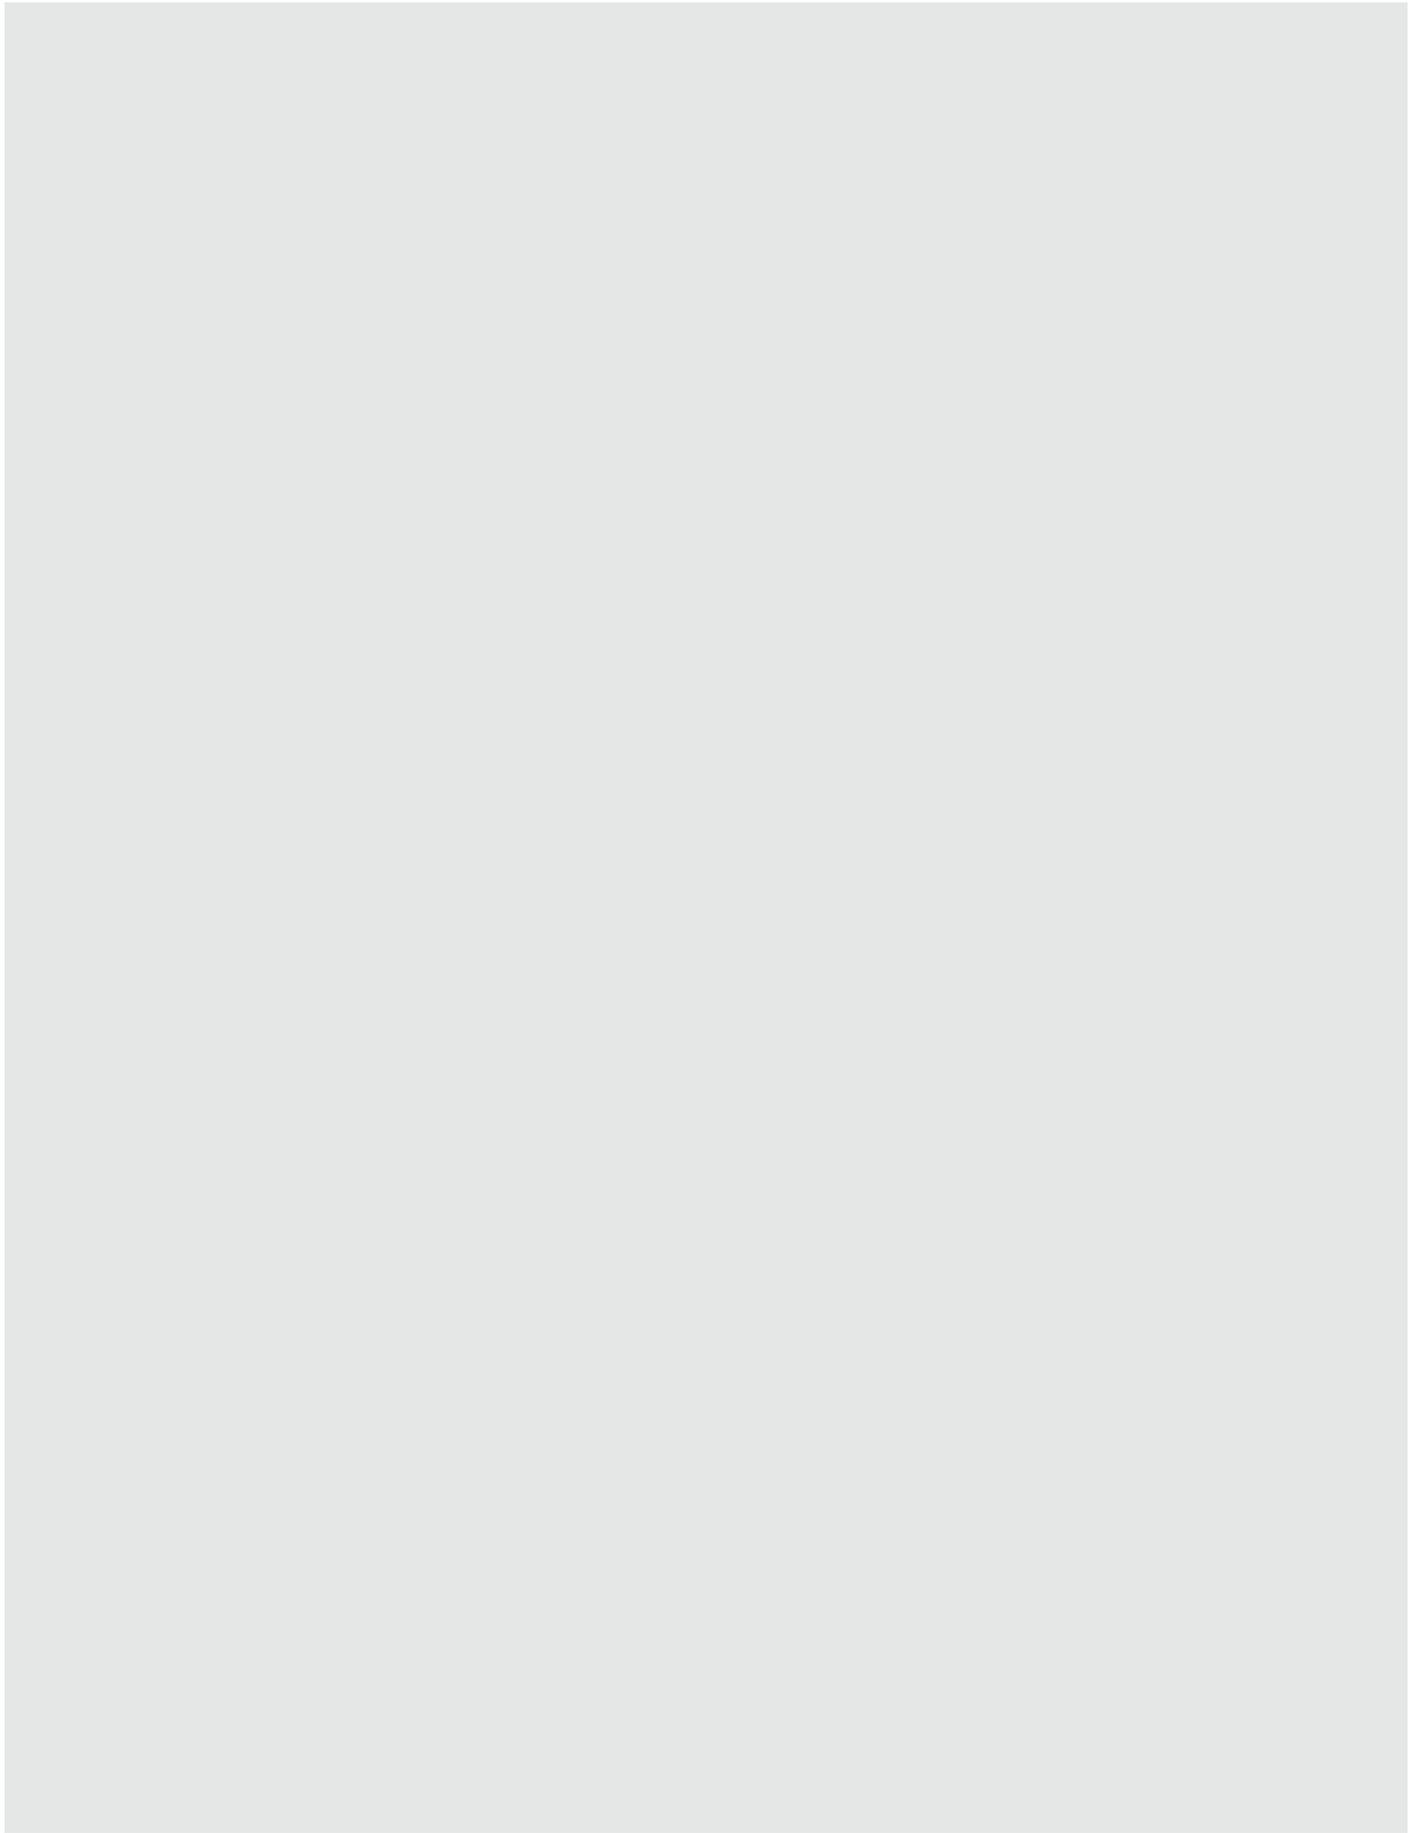

Backed up by international industry accreditations and awards, giving you confidence and certainty in working with us as a trusted, sustainable partner for the long term.
